

Your Web Accessibility Check Results

<https://spad.szczecin.pl/>

Did you know accessible websites generally deliver better user experience, enjoy better SEO results, and have a more positive effect on your bottom line? Check out your results and see how you can make your site more inclusive.

That's one fine looking site!

Nobody's perfect but you're getting close. Way to go!

Make Your Website Work for Everyone

Siteimprove's automated accessibility checks help you stay one step ahead in maintaining a

website that every visitor can use effectively.

Automatically Prioritised Issues

With Siteimprove, you don't have to be an accessibility expert—we pinpoint issues on-page and in-code and prioritise them for you. Plus, our integrations allow you to jump right into your CMS and fix the issue in minutes.

Hours of Time Saved

How long would it take to track down all the accessibility issues on your website—even those you don't know are there? We break issues down into manageable tasks that can be filtered by role or responsibilities, saving you countless hours in your conformance process.

Progress Reports

Show off your progress with historical graphs. You can even use them as proof that your organisation is progressing towards conformity. The Siteimprove DCI™ score shows your progress at a glance, while customisable dashboards and automated reports help keep you on the right track.

Want to learn more about how web accessibility can help improve your website's performance, optimise your user experience, boost SEO results, and more?
